PROFESSIONAL SUMMARY

Passionate about designing, building, and managing data pipelines that transform raw data into meaningful, actionable insights. Graduate of FNB App Academy, with continued professional development through CAPACITI, focused on data-driven problem solving and scalable data solutions.

What I Do:

I specialize in working with structured data, data cleaning, transformation, and analysis to support informed decision-making. My interests and skills span data engineering fundamentals, SQL-based data modeling, Python for data analysis, and building reliable data workflows that power analytics and reporting. I enjoy bridging the gap between raw data and business value through thoughtful data design and exploration.

TECHNICAL SKILLS

Data Engineering & ETL

- ETL Pipeline Development: Extract, Transform, Load (ETL) processes, Data Transformation, Pipeline Automation
- Big Data Technologies: Apache Spark, Apache Hadoop, Data Lakes, Distributed Computing
- Data Architecture: Data Warehousing, Data Modeling, Data Governance, Schema Design
- Data Processing: Web Scraping, Data Cleaning, Data Manipulation, Data Quality Management

Programming & Databases

- Languages: Python (pandas, NumPy, PySpark), SQL, JavaScript, YAML
- Databases: SQL (MySQL, PostgreSQL), NoSQL (MongoDB), Data Warehouse Design

Cloud Platforms & DevOps

- Cloud: AWS (EC2, S3, Data Migration), Google Cloud Platform (GCP), Microsoft Azure
- DevOps: Docker, Kubernetes, OpenShift, CI/CD Pipelines, Git, GitHub
- Development: RESTful APIs, Microservices Architecture, Agile/Scrum Methodologies

DATA ENGINEERING PROJECTS

MuseMotion - Electric Vehicle Data Platform | *Python, SQL, ETL Pipelines*

- Designed and implemented comprehensive ETL pipeline transforming raw electric vehicle data into structured, analytics-ready datasets
- Developed automated Python scripts for data extraction, cleaning, and transformation, reducing manual processing time by 80%
- Built SQL-based analytics layer enabling data-driven insights for business intelligence and decision-making
- Implemented data quality checks and validation processes ensuring 99% data accuracy across pipeline stages

AI-Powered Portfolio with Cloud Integration | *React, Claude AI API, AWS, Vite*

- Architected and deployed full-stack web application integrating AI capabilities with modern cloud infrastructure
- Implemented RESTful API integration with Claude AI for real-time data processing and intelligent responses
- Optimized application performance achieving sub-2-second load times through efficient data fetching and caching strategies
- Deployed production application using cloud services ensuring 99.9% uptime and scalability

MuseCareers - AI Career Intelligence Platform | JavaScript, Data Processing, AI/ML

- Co-developed data processing pipeline for CV evaluation system analyzing structured and unstructured career data
- Implemented data extraction and parsing algorithms to structure resume information for machine learning models
- Built recommendation engine matching candidate profiles with opportunities using data-driven matching algorithms

EDUCATION & CERTIFICATIONS

FNB App Academy Graduate | IT Varsity | July 2025

Specialized Training: Data Management & Analysis, Backend Development, Cloud Computing, Database Design

CAPACITI Professional Development Program | Ongoing

Data Engineering Certifications (In Progress):

- Introduction to Data Engineering - IBM (Completed Dec 2025) | Credential: DYJYCC7QMJQ4
- Python Project for Data Engineering - IBM (Completed Dec 2025) | Credential: FXN9XYQCW6Z8
- Advanced Data Engineering Specialization - Currently pursuing additional certifications in data pipelines and big data

Cloud Computing & DevOps:

- AWS Cloud Practitioner Essentials - Amazon Web Services (Dec 2025) | Credential: 892I6NU973WQ
- DevOps on AWS: Code, Build, and Test - Amazon Web Services (Dec 2025) | Credential: INXM0SXWIARR
- Introduction to Containers w/ Docker, Kubernetes & OpenShift - IBM (Dec 2025) | Credential: XEJ35BSDHB1N

AI & Machine Learning:

- Generative AI with Large Language Models - DeepLearning.AI (Dec 2025) | Credential: W9V9IITJ9CO1
- Introduction to Generative AI - Google Cloud (Oct 2025) | Credential: 9YA9YYSLWE25

LEADERSHIP EXPERIENCE

District President, Gauteng RCL | 2023

- Led district-wide team coordinating data-driven initiatives across multiple schools in Johannesburg South
- Managed project timelines, stakeholder communications, and resource allocation for inter-school programs
- Selected to represent Gauteng Province at National RCL Summit demonstrating leadership excellence

ADDITIONAL INFORMATION

- Languages: Setswana (Fluent), English (Fluent), Afrikaans (Moderate)
- GitHub Portfolio: github.com/Aobakwe2025 - Multiple data engineering and development projects
- Availability: Immediate
- Work Authorization: South African Citizen
